

PWGreen

P.O. Box 1752, Port Washington, NY 11050

Dear Friends of PWGreen,

May 2023

You and your Port Washington neighbors have been supporting the important work of PWGreen with your generous contributions for the last 20 years. We continue with our mission:

Protecting Natural Areas • Promoting Eco-Friendly Living • Providing Environmental Education

What We Did in 2022:

2nd Grade - Geology/Erosion

Sands Point Preserve

Native Plant/Pollinator Garden

Columbine

Kindergarten - Animal Homes

Cottontail Rabbit

- **Field Trips:** Coming out of the pandemic, we conducted several field trips for elementary students covering geology/erosion and animal homes.
- **Garden:** - This was our second year in the transformation of a weed patch in the Guggenheim Preserve to a beautiful native plant/pollinator garden. High School student interns and volunteers, through our partnership with ReWild Long Island, provided the bulk of the labor.
- **Scholarship:** We awarded a PWGreen scholarship for Excellence in Environmental Sciences to a Schreiber senior.
- **Ongoing:** The work we have done over the years will continue in 2023.

Thanks for your support

Susan Bagnini
